

TECHNICAL INFORMATION FOR DEVELOPERS

If you are here, you've likely already concluded a few things. You've decided you don't want to do the credit card processing piece yourself from scratch. You've also tried some "free" solutions and have found them to be unworkable for one reason or another.

One line of code is all you need for 90% of what we do. Here it is:

```
<script src="https://www.charitybox.com/{CHARITY}/BoxOfSix" type="text/javascript"></script>
```

This one line of code will bring in this box anywhere you put it:

Dimensions of box: 400 x 300

Tested on: IE 7&8, Safari, Firefox

Developed and maintained by:
Michael Grassman
MGrassman@designing-solutions.com

Technology used: AJAX & Telerik control set

Last major update: February, 2011
