## Donation of Stock or Mutual Fund Shares

It is a very exciting thing to receive some shares of stock as a gift from a donor.

It doesn't happen very often, however.

In speaking to donors around the country we've heard that donating stock is just too time-consuming. The problems center on the letter of instruction that must be faxed to the donor's broker in order to make the shares more to your organization.

Our service generates a "ready to fax" letter in seconds complete with red sign here sticker.
