Sub Funds Routing

Sub funds allow you to empower your donor to direct their donation to a specific charity, cause, or family foundation account.

For example, if your organization has 5 main projects going on all year long you can give the donor the ability to direct their contribution to a specific project.

If your organization is a parent organization for 2 or more sub organizations, you can let the donor direct their gift to a specific subaccount.

We DO NOT route the money differently, but we do provide separate accounting and notification so you can route the money where it needs to go.

Priced at \$500 annually
